

## SUN SMART POLICY

### Help for non-English speakers

If you need help to understand the information in this policy, please contact school administration.

### Purpose

The sun's ultraviolet (UV) radiation can't be seen or felt. Whatever the weather, it is important for people of all skin types to use sun protection whenever UV levels are at 3 or higher.

Too much UV radiation can cause sunburn, skin and eye damage, and skin cancer. UV damage accumulated during childhood and adolescence is strongly associated with an increased risk of skin cancer in later life. Australia has one of the highest rates of skin cancer in the world, with two out of three Australians developing some form of skin cancer before age 70.

By teaching sensible sun protection habits from an early age and implementing sun protection measures, schools can play a significant role in reducing skin cancer risk.

This SunSmart policy provides guidelines to:

1. ensure that all students and staff are protected from over-exposure to UV radiation
2. ensure the outdoor environment provides shade for students and staff
3. ensure students are encouraged and supported to develop independent sun protection skills to help them be responsible for their own sun protection
4. support our school's strategies to meet its duty-of-care and Occupational Health and Safety obligations to minimise harmful UV exposure for students, staff and visitors.

### Scope

#### Legislation and Standards

1. Duty of Care
2. Occupational Health and Safety Act 2004
3. Education and Training Reform Act 2006: Sch.5 Reg. 1 (1.2)

### Policy

#### Procedures

- To assist with the implementation of this policy, staff and students are encouraged to access the daily local sun protection times via the *SunSmart widget* on the school's website, the free *SunSmart app*, or at [sunsmart.com.au](http://sunsmart.com.au).

- The sun protection measures listed are used for all outdoor activities during the **daily local sun protection times**. The sun protection times are a forecast from the Bureau of Meteorology for the time-of-day UV levels are forecast to reach 3 or higher. In Victoria, UV levels regularly reach 3 or higher from mid-August to the end of April.

## **Environment**

### **Seek shade**

- The school council makes sure that there are enough shelters and trees providing shade in outdoor areas, particularly in high-use areas and times where students have lunch, near the canteen, at assemblies, during sport lessons, during outdoor lessons and around popular play spaces.
- The availability of shade is considered when planning all other outdoor activities.
- Students are encouraged to use available areas of shade when outside.
- In consultation with the school council, shade provision is considered in plans for future buildings and grounds.
- A shade assessment is conducted regularly to determine the current availability and quality of shade.
- Students who do not have appropriate hats or outdoor clothing are asked to play in a designated shaded area that is protected from the sun.

### **Behaviours**

*Certain health conditions and medications mean some people are more sensitive to UV radiation and must always use sun protection, regardless of the UV levels. Parents need to notify the school if this is the case for their child so that protective strategies can be implemented throughout the year.*

### **Slip on sun protective clothing**

- Cool, loose-fitting, sun protective clothing made of densely woven fabric is included in our school uniform / dress code and sport uniform. It includes shirts with collars and elbow-length sleeves, longer dresses, shorts and rash vests or t-shirts for outdoor swimming.

### **Slap on a sun protective hat**

- All students and staff wear hats that protect their face, neck and ears (broad-brimmed school uniform hats), whenever they are outside. Caps and visors are not considered a suitable alternative.
- Students without a sun protective hat must remain in the designated shaded area. Hats are not shared nor loaned for health reasons.

### **Slop on sunscreen**

- Students provide their own SPF30 (or higher) broad-spectrum, water-resistant sunscreen. This is included on the school's booklist each year.
- Students are encouraged to apply sunscreen in accordance with the manufacturer's directions (applied at least 20 minutes before going outdoors and reapplied every two hours, or more frequently if sweating or swimming).

- Strategies are in place to remind students to apply sunscreen before going outdoors (e.g., reminder notices, sunscreen monitors, sunscreen buddies).

### **Slide on sunglasses [if practical]**

- Where practical, students can wear close-fitting, wrap-around sunglasses that meet the Australian Standard 1067 (Sunglasses: Category 2, 3 or 4), and that cover as much of the eye area as possible.

### **Learning**

- Learning about sun protection is included in the curriculum for all year levels.
- Students are encouraged to be involved in initiatives to promote and model sun protection measures to the whole school community.
- SunSmart behaviour is regularly reinforced and promoted to the whole school community through newsletters, school website/intranet, staff and parent meetings, school assemblies, student and teacher activities and at student enrolment/new staff orientation.

### **OHS**

- As part of OHS UV risk controls and role-modelling, staff, families and visitors:
  - wear a sun protective hat, clothing that provides protective cover and if practical, sunglasses
  - apply sunscreen
  - seek shade whenever possible.
- UV radiation exposure is considered as part of a school's risk management and assessment for all outdoor events and activities on and off-site e.g., UV radiation protection strategies (hats, clothing, shade and sunscreen), are included in school camp activities, excursions, sports days and interschool sports events.

### **Communication**

This policy will be communicated to our school community in the following ways:

- Available publicly on school website
- Included in staff induction processes
- Included in transition and enrolment packs
- Discussed at parent information nights/sessions as necessary hard copy available from school administration upon request
